I am an Assistant Professor in the CSE department at UC Santa Cruz, with expertise in computer security and networking research. My expertise lies in building empirical methods to detect, analyze and prevent large-scale security and privacy threats to Internet users. My research involves longitudinally measuring Internet censorship and connection tampering at global scale, and examining the technologies that enable tampering. My research has helped produce the [Censored Planet Observatory](#), and I am the recipient of a FOCI Rising Star Award, an OTF Information Controls Fellowship, and an IRTF Applied Networking Research Prize.
